EDUCATION

B.S. Computer Engineering / Minor in Computer Science

Aug. 2022 – May 2026

University of Oklahoma

- GPA: 3.53/4.00, Dean's List (6 semesters)
- Extracurriculars: OU AI/ML, National Make a Medical Device Competition, OU Valorant, OU Climbing

EXPERIENCE

Co-Founder & Product Lead

Mar. 2025 – Aug. 2025

PhantomMend

Oklahoma City, OK

- Directed a **5-engineer team** in developing a medical device prototype and FDA regulatory plan, securing **3rd place** out of 30 national teams with a \$150 device challenging a \$15,647 annual treatment.
- Validated a critical market gap by conducting **25+ medical professional interviews**, defining product requirements that centered on affordability and daily prosthetic integration
- Drafted foundational sections of the technical software description for the team's provisional patent application, contributing to the successful protection of its intellectual property

AI Researcher

Apr. 2025 – Aug. 2025

The University of Electro Communications

Tokyo, Japan

- Analyzed a 4,000-sample dataset generated with 4 leading LLMs, identifying a universal 6-step structural template common to all AI-generated content
- Authored a research abstract and poster, and presented findings on AI-generated content patterns at the JUSST Program Conference in Tokyo

IT Systems Intern

May 2024 – Aug. 2024

Paycom

Oklahoma City, OK

- Developed an automated performance monitoring solution with PHP and Grafana, deploying it in a Docker and Kubernetes environment to provide key benchmarking data for VMware contract negotiations
- Presented data-driven analysis on infrastructure performance to senior leadership, directly influencing migration strategy and supporting VMware contract negotiations

PROJECTS

Heart Rate Zone Monitor

- Designed, simulated (MultiSim), and built a heart rate monitor using infrared photoplethysmography (PPG) and analog circuitry
- Implemented a multi-stage signal processing pipeline with active filters and comparator circuits to successfully categorize heart rate into three distinct exercise zones (resting, moderate, high-intensity)

SKILLS

Product: Product Strategy, Market Validation, User Research, Agile Methodologies, Compliance

Technical: Python, Java, C++, PHP, SQL, Git, Machine Learning (TensorFlow, PyTorch), Data Visualization (Grafana), Circuit Simulation (MultiSim), Splunk, Prometheus, Docker, Kubernetes

AWARDS

- Boy Scouts of America Eagle Scout
