EDUCATION

B.S. Computer Engineering / Minor in Computer Science
University of Oklahoma

Aug. 2022 – Dec. 2025

- GPA: 3.6/4.00, Dean's List (6 semesters)
- Extracurriculars: OU AI/ML, National Make a Medical Device Competition, OU Valorant, OU Climbing

EXPERIENCE

Co-Founder & Product Lead
PhantomMend

Mar. 2025 – Aug. 2025

- Led cross-functional team of 5-engineer team to **3rd place finish out of 30 national teams** in medical device competition, coordinating product development across time zones during international study abroad
- Validated product-market fit through **25+ professional interviews**, identifying critical insights that drove strategic pivot toward simplified, affordable daily-wear solution (\$150 vs. \$15,647 incumbent)
- Facilitated cross-functional decision-making between hardware and software teams, resolving design conflicts and maintaining team alignment under tight competition timeline

IT Systems Intern
Paycom

May 2024 – Aug. 2024
Oklahoma City, OK

- Developed an automated performance monitoring solution with PHP and Grafana, deploying it in a Docker and Kubernetes environment to provide key benchmarking data for VMware contract negotiations
- Presented data-driven analysis on infrastructure performance to senior leadership, **directly influencing migration strategy** and supporting VMware contract negotiations

PROJECTS

Product Manager | Indonesian Connectivity Analysis (Capstone Project)

Aug. 2025 – Dec. 2025

- Lead cross-functional team of 4 analyzing Indonesian connectivity patterns using Ookla Speedtest Intelligence dataset, coordinating with industry partner (Ookla) to define project scope and methodology
- **Iterated on** ambiguous research requirements based on stakeholder feedback, adapting project scope following Critical Design Review
- Delivered 3 prioritized connectivity recommendations to Ookla stakeholders, incorporating infrastructure constraints and budget trade-offs from 50M+ data point analysis

Product Manager & Full-Stack Developer | Second Space

Aug. 2025 – Dec. 2025

- Lead 7-person development team building Pinterest-style web application using React/TypeScript frontend and Node.js/Express backend with PostgreSQL database
- Defined product roadmap and UI/UX strategy, designing interface elements and information architecture while contributing to full-stack development

SKILLS

Product: Product Strategy, Market Validation, User Research, Agile Methodologies, Stakeholder Management

Technical: Python, Java, C++, PHP, SQL, Git, React/TypeScript, Node.js, Machine Learning (TensorFlow, PyTorch), Docker, Kubernetes, Embedded Systems (STM32)

Tools: Figma, Grafana, PostgreSQL

AWARDS

- **Boy Scouts of America Eagle Scout**
